

KAIVALYA JOGLEKAR

Mumbai, India | +91-79779-01515 | kaivalyajoglekar416@gmail.com | linkedin.com/in/kaivalya-joglekar | github.com/kaivalyajoglekar

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++

Frontend: React.js, Next.js, Tailwind CSS, Flutter

Backend: FastAPI, Express.js, Node.js, REST APIs, WebSockets

AI/ML: scikit-learn, LangGraph, Gemini API, Isolation Forest, Random Forest, Gradient Boosting, SVM

Databases & Cloud: Firebase, Firestore, Supabase

Tools: Git, GitHub, Postman, Vercel, Render

Core Concepts: Data Structures & Algorithms, Machine Learning, AI Agents, Authentication, CI/CD, Agile/Scrum

Projects

RouteSense – Autonomous Logistics AI Agent

2026

LangGraph | Python | Gemini 2.0 Flash | Gradient Boosting

- Built an autonomous observe-detect-reason-act AI agent to monitor 60+ shipments, 10 warehouses, and 12 carriers on a 60-second refresh cycle.
- Integrated a Gradient Boosting model trained on 5,000 samples with Gemini 2.0 Flash for disruption detection, root-cause reasoning, and decision support.

Behavioral Biometrics Security System

FastAPI | WebSockets | Python | scikit-learn | Isolation Forest | Random Forest

- Developed a real-time behavioral biometrics system streaming keystroke, mouse, and scroll telemetry into a FastAPI backend using WebSockets.
- Engineered an ML pipeline using Isolation Forest and Random Forest to evaluate 34 behavioral features for anomaly detection and risk scoring.

Elevate AI – Resume Analysis Platform

2026

React.js | TypeScript | Tailwind CSS | Gemini API

- Built a resume analysis platform to extract candidate skills, evaluate ATS fit across 10+ roles, and identify role-specific skill gaps.
- Integrated Gemini API to generate targeted resume insights, keyword recommendations, and personalized improvement suggestions.

Leadership Experience

TAQNEEQ Tech Fest

Mumbai, India

Sub-Head – Artist and Guest Management

Oct 2024 – Jun 2025

- Led a 12+ member team responsible for artist logistics, guest coordination, hospitality, stage readiness, and live-event execution.
- Created real-time schedules, coordinated with operations and technical teams, and resolved on-ground issues to maintain smooth fest flow.

Technical and Research Cell

Mumbai, India

Senior Executive – Web Development, Event Execution, and Guest Relations

Aug 2023 – Jun 2025

- Co-developed and deployed official websites for flagship initiatives including the Bombay Research Summit and Internship Fair.
- Built responsive interfaces and registration-ready workflows to support student participation, event discovery, and execution readiness.
- Coordinated with guest speakers, industry judges, corporate partners, student participants, and internal teams for flagship initiatives.
- Supported on-ground execution, communication workflows, website updates, and participant management during active event timelines.

Research Publication

Classification of Celestial Bodies using SVM

Feb 2026

ICICC 2026 – Springer | Peer-reviewed

- Designed a 61-feature extraction framework using Hu Moments, Local Binary Patterns, and radial intensity profiles on SDSS FITS imagery.
- Improved SVM classification accuracy from 57.5% to 74.6% through feature engineering and hyperparameter tuning.

Education

NMIMS Mukesh Patel School of Technology Management & Engineering

Mumbai, India

B.Tech in Computer Engineering | GPA: 3.16 / 4.0

2023 – 2027
